U.S. Patent and Trademark Office PTOL-326 (Rev. 08-06)

DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species I, claims 1-20 is acknowledged and claims 1-20 are generic to all species.

Further, this group contains claims 1-20 directed to the following patentably distinct subspecies of the claimed invention: Subspecies A, claims 1-9,18,20, drawn to a semiconductor device, classified in class 257, subclass 28.

Subspecies B, claims 10-17,19,20, drawn to a semiconductor device, classified in class 257, subclass 14.

The subspecies are independent or distinct because the subspecies A having a first superlattice layer which is formed above the substrate and in which an n-type AIGaN layer and an n-type GaN layer are alternately layered; and a second superlattice layer which is formed above the multiple quantum well layer and in which a p-type AIGaN layer and a p-type GaN layer are alternately layered while the subspecies B does not have a first superlattice layer which is formed above the substrate and in which an n-type AIGaN layer and an n-type GaN layer are alternately layered; and a second superlattice layer which is formed above the multiple quantum well layer and in which a p-type AIGaN layer and a p-type GaN layer are alternately layered.

- 2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed subspecies for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 10 is generic to claim 1.
- 3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2826

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields of search are not coextensive and separate examination would be require, restriction for examination purposes as indicated is proper.
- 5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 FR 1.143).

Application/Control Number: 10/516,703

Art Unit: 2826

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to TAN N. TRAN whose telephone number is (571) 272-1923. The

examiner can normally be reached on 8:30-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, FAHMY WAEL can be reached on (571) 272-1705. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
